

listen the minute dotcom technology what what we do without technology would we still be living in caves probably i think there are two main kinds of technology the kinds before and after computers when we think about technology before computers it was quiet basic it was all mechanical things like steam trains and is at the time that was cutting edge technology but today's technology is really cutting edge it's the kind of technology that is out of date as soon as it hits the shelves i love this it's so exciting seeing it all happen i love reading about what technology will have in the future and then by it's a few years later it's like buying technology from science fiction movies i'd love to live to be two hundred so i can see what technology is around them.....nbgfdsdfghjhasdfghjkasdfghjk
